

CAPABILITY STATEMENT

Established in 2022, **spinTwo** is a **cutting-edge technology** provider of **advanced computing solutions** including High-Performance Computing (HPC) systems and High-End Data Analytics (AI/ML/DL), offering a **comprehensive suite of services** designed to **simplify** and **enhance** your journey into next-gen data processing systems, thus acting as a market **differentiator** based on over **50 years** of its founders' combined experience.

CORE COMPETENCIES

AI, Data Science & HPC Solutions

We design and integrate advanced workflows with large-scale systems and custom HPC infrastructures to boost performance and efficiency.

Data-Driven Insights & Decision Support

We leverage analytics to support smarter strategies and deliver a competitive edge in the market.

Collaborative Research & System Integration

We foster cross-sector partnerships and enable seamless system interoperability to enhance research and operational workflows.

Secure, Scalable & Automated Systems

We build flexible, zero-trust environments that protect sensitive data, support automation, and accelerate research.

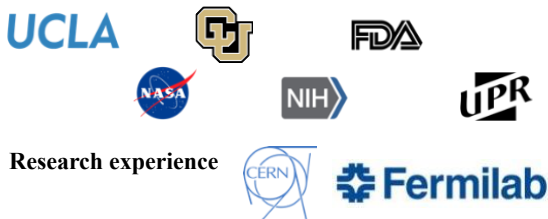

Consulting & Advisory Services

We provide expert guidance to overcome technical challenges, enhance operational efficiency, and ensure secure data access.

KEY ATTRIBUTES

- ⇒ **A unique blend of scientific expertise** in advanced computing systems, driving innovative solutions and accelerating research.
- ⇒ **Built and managed HPC systems** across government and academia, boosting research and computational efficiency.
- ⇒ **Leading a team supporting the NAIRR Secure Pilots** enhancing secure access and interoperability for federal research.
- ⇒ **Empowering customers through strong user outreach** in advanced computing, optimizing infrastructure for evolving business and research needs.
- ⇒ **Democratizing access to cutting-edge computing systems**, making powerful resources available across sectors.
- ⇒ **Contributing scientist** in the discovery of the Higgs Boson at CERN, showcasing commitment to scientific excellence.

PAST PERFORMANCE

COMPANY DATA

NAICS Codes: 541511, 541512, 541519, 541611, 541618, 541690.

CAGE Code: 9ZZS9

UEI: CGQXHP6UKC38
